Fish and Wildlife Service

The FWS Ecological Services Program provides Federal financial assistance on a competitive basis to States, other Federal agencies, landowners, educators, non-profit organizations, researchers, and other partners to secure information about endangered, threatened or candidate species, to aid in the recovery of these species, to avert listing of species pursuant to the Endangered Species Act, and to help conserve the ecosystems upon which these species depend. The FWS and National Marine Fisheries Service (NMFS), which is part of the Department of Commerce's NOAA Fisheries office, share Endangered Species Act responsibilities for several species such as sea turtles. We have responsibility for sea turtles when they are on land, and NMFS has responsibility for sea turtles when they are in the water. Projects for NMFS-managed species are not included in this funding opportunity. This Recovery Implementation funding opportunity is intended for projects that will contribute to the recovery of FWS-managed endangered and threatened species in the United States, and is limited to projects carrying out actions described in a species approved recovery plan, in the implementation schedule of a species approved recovery plan, actions

recommended in a completed 5-year status review of the species or in a spotlight species action plan, or projects documenting species response to climate change. For example: securing scientific information about endangered or threatened species, implementing restoration actions that will lead to delisting of a species, help prevent extinction of a species, or aid in the recovery of a species. Projects that address species response to climate change will receive additional consideration.

Fish and Wildlife Service

Description

The U.S. Fish and Wildlife Service (Service) Fisheries Program's National Fish Passage Program is a voluntary, non-regulatory conservation assistance program that provides financial and technical assistance to remove or bypass artificial barriers that impede the movement of fish and other aquatic species and contribute to their decline. The National Fish Passage Program received \$11.0 million of operational funds to implement the program in Fiscal Years 2011. The Service will implement fish passage improvement-based, cost-shared projects to protect, restore, or enhance habitats that support fish and other aquatic species and their populations. All or a portion of project funds may be transferred to partner organizations through cooperative agreements if the Service lacks the capability to implement a project. To determine eligibility of a specific project contact the REGIONAL COORDINATOR in your area. A list of Coordinators and their responsible geographical areas is attached to this announcement under the APPLICATION INSTRUCTIONS.

GRANTS

The Department offers funding opportunities to conduct research, to support law enforcement activities in state and local jurisdictions, to provide training and technical assistance, and to implement programs that improve the criminal justice system.

OJP Office of Justice Programs offers federal financial assistance to scholars, practitioners, experts, and state and local governments and agencies. Many of the program bureaus and offices award formula grants to state agencies which sub-grant funds to units of state and local government. Discretionary grant funds are announced in the Federal Register or through program solicitations that can also be found through bureau and OJP Websites. [Funding Opportunities at OJP](#) provides links to application kits, current funding opportunities listed by source, and the Grants Management System (GMS). Of particular use to new applicants, the [OJP Grants 101](#) portal presents a step-by-step guide through the grant application process.

OVW U.S. Department of Justice Office on Violence Against Women administers 19 grant programs to help provide victims of domestic violence, sexual assault, dating violence, and stalking with the protection and services they need to pursue safe and healthy lives and enable communities to hold offenders accountable for their violence.

COPS The Community Oriented Policing Services Office (COPS) offers grants to help law enforcement agencies to hire more community policing officers, to acquire new technologies and equipment, to hire civilians for administrative tasks, and to promote innovative approaches to solving crime. The [COPS Office Response Center](#) provides information on programs, grants, and application assistance for the Office of Community Oriented Policing Services. The COPS Office Response Center also assists COPS grantees with financial questions and grant-related inquiries about COPS.

Description:

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) envisions a nation where our children are healthy, educated, and free from violence. If they come into contact with the juvenile justice system, the contact should be rare, fair and beneficial to them. To fulfill this vision, OJJDP will make awards to currently operating juvenile drug courts to enhance their capacity and the services they provide. A juvenile drug court provides comprehensive, developmentally appropriate, community-based services for youth who come in contact with the juvenile justice system due to alcohol or other drug use. This program is authorized pursuant to 42

envisioning a nation where our children are healthy, educated, and free from violence. If they come into contact with the juvenile justice system, the contact should be rare, fair, and beneficial to them. To meet this vision, OJJDP is partnering with the Department of Education and Substance Abuse and Mental Health Services Administration (SAMHSA) to implement a multidisciplinary initiative to improve school climates, respond early and appropriately to student mental health and behavioral needs, avoid referring students to law enforcement and juvenile justice as a disciplinary response, and facilitate a proactive and supportive school reentry process in the rare instances in which a youth is referred. The larger goal of this program is to enhance collaboration and coordination among schools, mental and behavioral health specialists, law enforcement, and juvenile justice officials at the local level to ensure adults have the support, training, and a shared framework to help students succeed in school and prevent negative outcomes for youth and communities. This program is authorized pursuant to paragraph (3)(D) under the Juvenile Justice heading in the Department of Justice Appropriations Act, 2014, P.L. 113-76, 128 Stat. 5, 64-65.

NASA Acquisition Internet Service (NAIS) - is a service, from which industry has immediate access to current acquisition information over the internet. The NAIS is a collection of on-line servers operated at each NASA field installation, and all are interconnected to ease the vendor's access to all NASA acquisitions. Synopses, solicitations, award notices, acquisition forecasts, regulations, forms, and small business assistance are posted.

- View contracts, grants, space act agreements or cooperative agreements and any purchase order with a value greater than \$25,000 awarded or modified during a fiscal year. This data has been made available here to provide assistance to NASA management, industry, private individuals, and other government entities.
- NASA Unsolicited Proposals - Guidance for the Preparation and Submission. This document provides guidelines for the preparation of formal unsolicited proposals to those who wish to convey their creative methods or approaches to NASA. These guidelines apply to all unsolicited proposals regardless of the NASA installation or Agency program for which they are intended, but do not apply to solicited proposals.
- Grant and Cooperative Agreement Handbook - Active Grant Notices (GNs) and Active Grant Information Circulars (GICs). This handbook consists of four sections that prescribe policies and procedures relating to the award and administration of NASA grants and cooperative agreements.
- NASA Acquisition Forecast - It is NASA policy to prepare an annual forecast and a semiannual update of expected contract opportunities, or classes of contract opportunities, for each fiscal year. The forecast consolidates anticipated procurements (in excess of the simplified acquisition threshold) at each NASA Center with the aim of increasing industries' advance knowledge of NASA requirements and to enhance competition. This forecast is subject to revision or cancellation, and is for Government planning purposes only. You are urged to review the Commerce Business Daily and the NASA Acquisition Internet Service for the actual notice of a pending contract action.

after June 1, 2015. The guiding
principle of "Art Works" is at the
center of everything we do at the
NEA. "Art Works" refers to three
things: the works of art themselves,
the ways art works on audiences, and
the fact that art is work for the artists
and arts professionals who make up
the field. To make "art work," the
NEA has included the advancement
of innovation as a core component of
its mission as a way to ensure the
vitality of the arts. We recognize that
arts and design organizations are
often in the forefront of innovation
in their work and strongly encourage
innovative projects which are
characterized as those that: • Are
likely to prove transformative with
the potential for meaningful change,
whether in the development or
enhancement of new or existing art
forms, new approaches to the
creation or presentation of art, or
new ways of engaging the public

with art; • Are distinctive, offering fresh insights and new value for their fields and/or the public through unconventional solutions; and • Have the potential to be shared and/or emulated, or are likely to lead to other advances in the field.

Through the projects that we support in the Art Works category, we want to achieve the following four outcomes: • Creation: The creation of art that meets the highest standards of excellence, • Engagement: Public engagement with diverse and excellent art, • Learning: Lifelong learning in the arts, and • Livability: The strengthening of communities through the arts.

Museums, Libraries, and Cultural Organizations grants provide support for museums, libraries, historic places, and other organizations that produce public programs in the humanities. Grants support the following formats: √ exhibitions at museums, libraries, and other venues; √ interpretations of historic places, sites, or regions; and √ book/film discussion programs; living history presentations; and other face-to-face programs at libraries, community centers, and other public venues. NEH encourages projects that explore humanities ideas through multiple formats. Proposed projects might include complementary components that deepen an audience's understanding of a subject: for example, a museum exhibition might be accompanied by a website, mobile app, or discussion programs. Types of Museums, Libraries, and Cultural Organizations awards
Planning grants support the early stages of project development, including consultation with scholars, refinement of humanities themes, preliminary design, testing, and audience evaluation. Implementation

National Endowment for the

NEH Bridging Cultures at
Community Colleges grants are
intended to strengthen and enrich
humanities education and
scholarship at community colleges
or community college systems.
Grants are used to enhance the
humanities content of existing
programs, develop new programs, or
lay the foundation for more
extensive endeavors in the future.

NEH Bridging Cultures at
Community Colleges grants create
opportunities for community college
faculty members to study together
while improving their capacity to
teach the humanities; enhance or
develop areas of need in an
institution's humanities programs;
and give community college faculty
access to humanities resources
through partnerships with other
institutions with appropriate
resources. Projects must focus on the
theme of Bridging Cultures. This
agency-wide initiative encourages
exploration of the ways in which
cultures from around the globe, as
well as the myriad subcultures

within America's borders, have influenced American society. With the aim of revitalizing intellectual and civic life through the humanities, NEH welcomes proposals that enhance understanding of diverse countries, peoples, and cultural and intellectual traditions worldwide. Applications might also investigate how Americans have approached and attempted to surmount seemingly unbridgeable cultural divides, or examine the ideals of civility and civic discourse that have informed this quest. In connection with a focus on civic discourse, projects might explore the role of women in America's civic life as well as the civic role of women in other cultures and regions of the world. Projects must draw on sound humanities scholarship related to the theme of Bridging Cultures, engage participating faculty in shared readings of important humanities texts, involve humanities scholars with appropriate expertise, improve the quality of humanities course offerings at a community college or community college system, and create opportunities to disseminate their results. The application must reflect a collaborative relationship between a community college or community college system and another institution with appropriate resources (such as a college or university, museum, research library, or professional association) in the planning and implementation of the project. The applicant of record may be a community college, community college system, or another institution with appropriate resources.

Agency Name:	National Endowment for the Humanities
Description:	The Humanities Collections and Reference Resources (HCRR) program supports projects that provide an essential underpinning for scholarship, education, and public programming in the humanities. Thousands of libraries, archives, museums, and historical organizations across the country maintain important collections of books and manuscripts, photographs, sound recordings and moving images, archaeological and ethnographic artifacts, art and material

culture, and digital objects. Funding from this program strengthens efforts to extend the life of such materials and make their intellectual content widely accessible, often through the use of digital technology. Awards are also made to create various reference resources that facilitate use of cultural materials, from works that provide basic information quickly to tools that synthesize and codify knowledge of a subject for in-depth investigation. HCRR offers two kinds of awards: 1) for implementation and 2) for planning, assessment, and pilot efforts (HCRR Foundations grants).

Description:	The National Endowment for the Humanities (NEH) in the United States and the German Research Foundation (Deutsche Forschungsgemeinschaft e.V., DFG) are working together to offer support for projects that contribute to developing and implementing digital infrastructures and services for humanities research. In order to encourage new approaches and develop innovative methods in any field of the humanities, these grants provide funding for up to three years in any of the following areas: ζ developing innovative methods ζ as well as standards and best practices for building and merging digital collections that are significant and of

major current interest, for use in humanities research; ζ developing and implementing generic tools, methods, and techniques for accessing and processing digital resources relevant to humanities research; ζ creating new digital modes of scholarly communication and publishing that facilitate international cooperation and dissemination of humanities scholarship; and ζ developing models for effectively managing digital data generated in humanities research projects (for example, texts, audio files, photographs, 3D objects) and exemplifying those models in case studies.

Agency Name:	National Endowment for the Humanities
Description:	Grants for Fellowship Programs at Independent Research Institutions (FPIRI) support fellowships at institutions devoted to advanced study and research in the humanities. Recognizing that at times scholars need to work away from their homes and institutions, the FPIRI program offers fellowships that provide scholars with research time, a stimulating intellectual environment, and access to resources that might otherwise not be available to them. Fellowship programs may be administered by independent centers for advanced study, libraries, and museums in the United States; American overseas research centers; and American organizations that

have expertise in promoting research in foreign countries. Individual scholars apply directly to the institutions for fellowships. A list of currently funded institutions is available. In evaluating applications consideration is given to the library holdings, archives, special collections, and other resources either on site or nearby that institutions make available to fellows. FPIRI grants provide funding to programs for humanities fellowships of four to twelve months. The fellowships are held at the U.S. grantee institutions Orin the case of overseas research centers and organizations abroad. Fellowship tenure must be fulltime and continuous. FPIRI-funded fellows must be selected by an external committee. FPIRI grants support fellowship stipends at a rate of \$4,200 per month and a portion of the costs of selecting the fellows, up to \$7,000. Indirect costs are not allowed in this program.

National Science Foundation

General Funding Overview

The National Science Foundation funds research and education in most [fields of science and engineering](#). It does this through grants, and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the United States. The Foundation accounts for about one-fourth of federal support to academic institutions for basic research.

NSF receives approximately 40,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships.

The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Who May Submit Proposals:

Agency Name:
Description:

Proposals may only be submitted by the following: Eligible predominantly undergraduate institutions (PUIs) are accredited colleges and universities (including two-year community colleges) that award Associate's degrees, Bachelor's degrees, and/or Master's degrees in NSF-supported fields, but have awarded 20 or fewer Ph.D./D.Sci. degrees in all NSF-supported fields during the combined previous two academic years. Who May Serve as PI: See Additional Eligibility Information in Section IV.B of this solicitation.

National Science Foundation
The Research in Undergraduate Institutions (RUI) and Research Opportunity Awards (ROA) funding opportunities support research by faculty members at predominantly undergraduate institutions (PUIs). RUI proposals support PUI faculty in research that engages them in their professional field(s), builds capacity for research at their home institution, and supports the integration of research and undergraduate education. ROAs similarly support PUI faculty research, but these awards typically allow faculty to work as visiting scientists at research-intensive organizations where they collaborate with other NSF-supported investigators. Eligible PUIs are accredited colleges and universities (including two-year community colleges) that award Associate's degrees, Bachelor's degrees, and/or Master's degrees in NSF-supported fields, but have awarded 20 or fewer Ph.D./D.Sci. degrees in all NSF-supported fields during the combined previous two academic

years. All NSF directorates may support RUI and ROA funding activities. Funding for these awards is contained within research and education program allocations and not held as a separate allocation. RUI and ROA proposals are evaluated and funded by NSF programs in the disciplinary areas of the proposed research and are funded at their discretion. Prospective PIs should contact disciplinary program officers to identify specific NSF programs and to determine the feasibility and timing of RUI/ROA requests. General RUI/ROA points of contact are available through the website

http://www.nsf.gov/crssprgm/rui_roa/contacts.jsp.

1. Research in Undergraduate Institutions (RUI).

An RUI proposal may be: A request to support an individual research project or a collaborative research project involving PUI faculty and students at their own or other institutions. A request involving shared research instrumentation.

2. Research Opportunity Awards

(ROA). The types of ROA

opportunities include: A supplement to an existing NSF award to support ROA activities for PUI faculty.

Requests to rebudget funds in an existing NSF award to support ROA activities for PUI faculty.

Submission of a new collaborative proposal between a PUI and another institution(s), with a ROA component as a subaward or as part of a linked collaborative proposal.

Starting or growing a business? Owning a small business can be a fulfilling endeavor, but as you probably already know or are just finding out – it requires that you wear many hats. This of course leaves you with little time to take a deep dive into the many aspects of starting and growing a business. Instead, many business owners turn to search engines for answers when questions come up.

But what if you had access to a small business classroom that provided informed, accurate and always-available access to the advice and guidance you need?

Welcome to the **SBA Small Business Learning Center**.

Online Training and Tools for Small Business Owners

Launched in late 2012, the SBA Small Business Learning Center is an online portal that hosts a variety of self-paced online training courses, quick videos, web chats and more to help small business owners explore and learn about the many aspects of business ownership.

Content is filtered by topic, so no matter the stage of your business, or the kind of insight you need, you can quickly get answers.

For example, if you're wondering how SBA loan programs work or just need a primer in accounting or small business taxes, check out these self-paced online financing courses and short videos. Or explore tips from the pros in these archived SBA Web Chats.

Other topics covered include starting a business as a young entrepreneur, an introduction to franchising, taking your business global with exporting, marketing 101, selling to the U.S. government, and much more.

Get More Help Offline

And if you can't find the training or advice that you need, use the "Get Local Assistance" interactive map to find one of many small business counseling, assistance and mentoring organizations in your community.

Browse around, and let us know what you think about the SBA Small Business Learning Center!

What the New Healthcare Law Means for Your Small Business

Meeting Description:

This webinar will focus on what the new healthcare law, the Affordable Care Act, means for small businesses. It will focus on both federal and state provisions to help local small business owners understand how the law will affect them. Topics being discussed include:

- Small business tax credits (available to businesses and tax-exempt non-profits) — who's eligible for them and how to claim them
- Marketplace updates
- Shared responsibility
- Cost containment

- Tools and resources available for small businesses interested in learning more about the law

A question and answer period will follow.

<https://cc.readytalk.com/cc/s/registrations/new?cid=ri009kv1izp1>

The SBA and Small Business Majority will continue to host free Affordable Care Act 101 weekly webinars so small business owners can learn the basics of the Affordable Care Act and how they can enroll in health insurance marketplaces.

Archive Date:	Oct 15, 2014
Eligible Applicants:	Others (see text field entitled "Additional Information on Eligibility" for clarification)
Additional Information on Eligibility:	Institutions of higher education and their affiliates
Agency Name:	DOT - FAA Centers of Excellence
Description:	SUMMARY: In accordance with Public Law 101-508, the FAA plans to competitively select a Center of Excellence for UAS within the next year. The COE will be a geographically disbursed consortium of the FAA, university partners and their affiliates selected by the FAA Administrator to conduct UAS related research, education and training while working jointly on issues of mutual interest and concern. The FAA will initially issue cooperative agreements to the selected university team members and specific projects will be defined and funded through matching grants over the life of the COE. In accordance with Public Law 101-508, the COE is responsible for

matching all funds granted to establish, operate and conduct related research, and may contract with others as appropriate. Following the COE competitive process, the FAA sponsor may also generate requirements that would be supported through contract tasks awarded by the FAA to the COE member universities for FAA purpose. SELECTION CRITERIA: The FAA Administrator will select the COE team on the ability of the applicant to meet the following criteria mandated by Congress: --The extent to which the needs of the State in which the applicant is located are representative of the needs of the region for improved air transportation services and facilities. --The demonstrated research and extension resources available to the applicant for carrying out the intent of the legislation. --The capability of the applicant to provide leadership in making national and regional contributions to the solution of both long-range and immediate air transportation problems. --The extent to which the applicant has an established air transportation program. --The demonstrated ability of the applicant to disseminate results of air transportation research and educational programs through a statewide or region-wide continuing education program. --The research projects that the applicant proposes to carry out under the grant. Please Note: • All criteria are weighted equally. • A page limit will be specified in the Draft and Final Solicitations. • The actual projects supported through the COE will be defined and further evaluated following selection of the COE

members. A research agenda will be developed during the first year of operation, and additional topic related tasks will be funded throughout the life of the Center. -2-

RESEARCH AREAS: The FAA intends for the Center members to support a broad range of research areas. Topics will include, but will not be limited to, the following:

1. Air Traffic Control Interoperability
2. Airport Ground Operations
3. Command and Control (C2)
4. Detect and Avoid (DAA)
5. Human Factors
6. System Performance
7. Privacy Practices for UAS Operations
8. System Engineering
9. Unmanned Aircraft Pilot Training and Pilot Certification Including Other UA Crew Members.

The FAA anticipates the COE will attract organizations such as industrial groups and other public and private entities interested in collaborating with and coordinating the research and related activities that will generate solutions to immediate and long-term UAS related issues. These organizations may be considered as affiliate members by the COE core universities and may provide matching contributions and receive funding from the COE. The FAA will issue a Draft Solicitation, allow for a period of public comment, and discuss the COE and UAS technical requirements at a public meeting that will be conducted in the Washington, DC area in May. For additional UAS information and public meeting registration details, visit the COE UAS website: <https://faa-uas-coe.net>.

-3- This meeting is a condition of the procurement process and potential applicants are encouraged but are not required to attend. Registration prior

to the meeting, however, will be mandatory. Contact: Patricia.Watts@FAA.gov to be placed on the COE mailing list for future COE notifications. AWARD DATE: The FAA Administrator expects to announce the final selection of the COE for UAS core team within the next year. Issued in Atlantic County, New Jersey on March 28, 2014. Funding levels to be determined

PARTNERSHIP OPPORTUNITIES

USAID recognizes that achieving sustainable solutions to global challenges requires us to work in close collaboration with countries, partners of all sizes, citizens and the wider development community.

We are passionate about embracing a new model of development that taps into the expertise, resources and innovations of a diverse array of organizations across the public, private and nonprofit sectors that can bring groundbreaking solutions to solving development challenges. We are increasingly focused on fostering locally-owned, sustainable solutions by creating new ways to work directly with local entrepreneurs, civil society organizations and partner country governments to help nations build innovative economies and democratic societies connected to our own. Find out how you can work with us to improve millions of lives around the world.

The Small Business Innovative Research Program - SBIR Program

The Small Business Innovation Research (SBIR) program is a highly competitive program that encourages domestic small businesses to engage in Federal Research/Research and Development (R/R&D) that has the potential for commercialization. Through a competitive awards-based program, SBIR enables small

businesses to explore their technological potential and provides the incentive to profit from its commercialization. By including qualified small businesses in the nation's R&D arena, high-tech innovation is stimulated and the United States gains entrepreneurial spirit as it meets its specific research and development needs.

SBIR Mission and Program Goals

The mission of the SBIR program is to support scientific excellence and technological innovation through the investment of Federal research funds in critical American priorities to build a strong national economy.

The program's goals are four-fold:

- Stimulate technological innovation
- Meet Federal research and development needs.
- Foster and encourage participation in innovation and entrepreneurship by socially and economically disadvantaged persons.
- Increase private-sector commercialization of innovations derived from Federal research and development funding.

SBIR-Participating Agencies

Each year, Federal agencies with extramural research and development (R&D) budgets that exceed \$100 million are required to allocate 2.5 percent of their R&D budget to these programs. Currently, eleven Federal agencies participate in the program:

- [Department of Agriculture](#)
- Department of Commerce - [National Institute of Standards and Technology](#)
- Department of Commerce - [National Oceanic and Atmospheric Administration](#)
- [Department of Defense](#)
- [Department of Education](#)
- [Department of Energy](#)
- [Department of Health and Human Services](#)
- [Department of Homeland Security](#)
- [Department of Transportation](#)
- [Environmental Protection Agency](#)
- [National Aeronautics and Space Administration](#)
- [National Science Foundation](#)

Each agency administers its own individual program within guidelines established by Congress. These agencies designate R&D topics in their solicitations and accept proposals from small businesses. Awards are made on a competitive basis after proposal evaluation.

Three-Phase Program

The SBIR Program is structured in three phases:

Phase I. The objective of Phase I is to establish the technical merit, feasibility, and commercial potential of the proposed R/R&D efforts and to determine the quality of performance of the small business awardee organization prior to providing further Federal support in Phase II. SBIR Phase I awards normally do not exceed \$150,000 total costs for 6 months.

Phase II. The objective of Phase II is to continue the R/R&D efforts initiated in Phase I. Funding is based on the results achieved in Phase I and the scientific and technical merit and commercial potential of the project proposed in Phase II. Only Phase I awardees are eligible for a Phase II award. SBIR Phase II awards normally do not exceed \$1,000,000 total costs for 2 years.

Phase III. The objective of Phase III, where appropriate, is for the small business to pursue commercialization objectives resulting from the Phase I/II R/R&D activities. The SBIR program does not fund Phase III. Some Federal agencies, Phase III may involve follow-on non-SBIR funded R&D or production contracts for products, processes or services intended for use by the U.S. Government
